

MASTERCLASS OR WORKSHOP

AI Without Overwhelm: A Practical Workflow for Educators

45 to 90 Minutes | Interactive

Faculty walk away with real tools, a workflow model, and the confidence to use AI in their teaching practice without losing the human center of their work. Delivered and documented across multiple faculty cohorts with near-universal positive outcomes.

LEARNING OBJECTIVES — PARTICIPANTS WILL BE ABLE TO:

1. Identify their current AI readiness posture using The C.A.R.E. Model for Human-Centered AI Strategy™
2. Apply a structured workflow model to at least one real teaching task using AI tools.
3. Develop a personal action plan for responsible AI integration in their instructional practice

BEST FOR

Higher education faculty, instructional designers, professional development programs, and curriculum teams.

AUDIENCE TAKEAWAY

A working AI workflow model and the confidence to apply at least one tool to a real task before the week is out.

DOCUMENTED OUTCOMES

Delivered across multiple faculty cohorts with documented outcomes, the program consistently results in participants reporting increased confidence and the immediate application of at least one AI tool within the week following the session.

HOST / AV REQUIREMENTS

Projection screen and HDMI or Zoom screen share | Slide deck provided | Room setup: rounds or theater preferred | Virtual delivery available.
