

INTERACTIVE SESSION

Empowering Through Digital Literacy: AI for Real Life

60 to 90 Minutes | Community Format

A values-grounded, accessible entry point for audiences who have been left out of the AI conversation. Kelly makes AI approachable, relevant, and immediately applicable to daily life, health, and community. Documented outcomes across senior and faith-based cohorts.

LEARNING OBJECTIVES — PARTICIPANTS WILL BE ABLE TO:

1. Define artificial intelligence in plain language applicable to daily life, health, and community contexts.
2. Identify at least one AI tool or application relevant to their personal or community needs.
3. Apply the equity and empowerment principles of The C.A.R.E. Model to evaluate AI tools for community use

BEST FOR

Faith communities, senior populations, community organizations, nonprofits, sorority chapters, and professional organizations.

AUDIENCE TAKEAWAY

Clarity on what AI is, at least one real-life application identified, and the confidence to take a first step without fear.

DOCUMENTED OUTCOMES

Documented outcomes across senior and faith-based community cohorts, consistently the highest audience engagement rate across all five environments Kelly works in.

HOST / AV REQUIREMENTS

Projection screen and HDMI or Zoom screen share | Slide deck provided | Room setup: rounds preferred for community feel | No tech experience required from participants | Virtual delivery available.
