

WORKSHOP

Human-Centered AI Strategy: Governance, Ethics, and Adoption for Institutions

60 to 90 Minutes | Working Session

Built for high-stakes environments where the ethics of AI use are not optional. Kelly brings clarity on boundaries, responsible integration, and institutional guardrails. Participants leave with a phase one governance roadmap specific to their environment.

LEARNING OBJECTIVES — PARTICIPANTS WILL BE ABLE TO:

1. Assess their institution's current AI governance maturity using the CEBRAYA readiness framework.
2. Identify specific ethical boundaries and guardrails applicable to their institutional context.
3. Draft a phase one governance roadmap with at least three prioritized action steps for their department or program

BEST FOR

Healthcare and medical education, institutional leadership teams, higher education administration, and nonprofit boards.

AUDIENCE TAKEAWAY

A completed organizational readiness snapshot and a phase one governance roadmap that they can act on immediately.

DOCUMENTED OUTCOMES

Deployed in medical education and healthcare faculty contexts % of participants in documented cohorts expressed continued interest in AI governance integration following the engagement.

HOST / AV REQUIREMENTS

Projection screen and HDMI or Zoom screen share | Slide deck provided | Working session format: tables preferred | Participants should come prepared to discuss a current AI challenge in their environment | Virtual delivery available.
